

CEE-280B-F

Multi-Functional Bag Making Machine for Powder

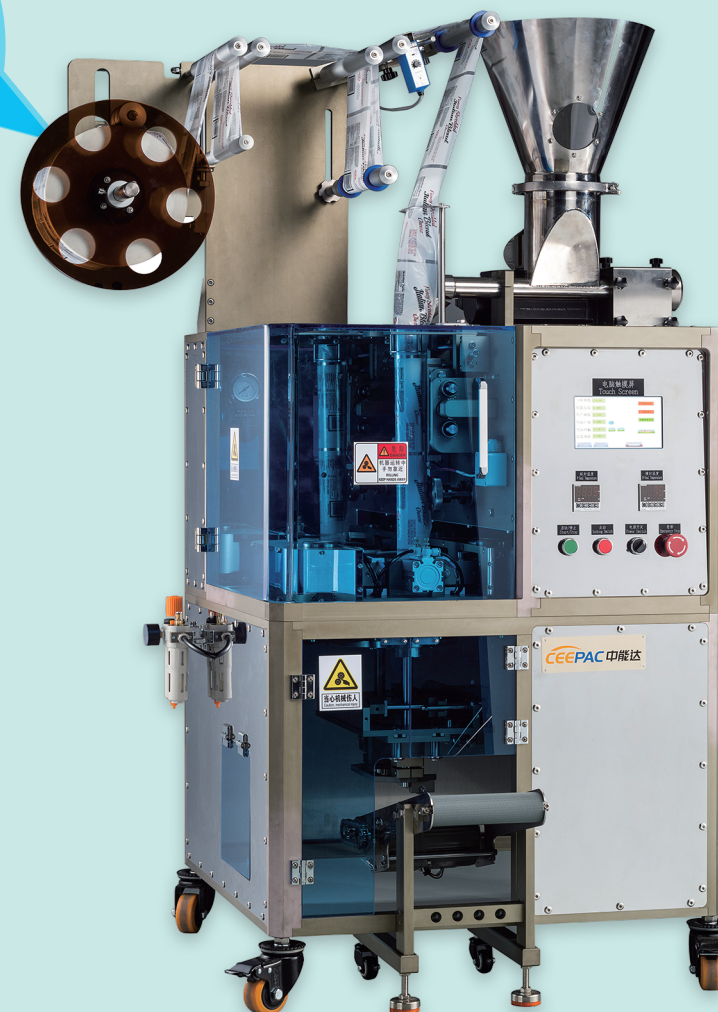

CEEPAC 中能达

Features

The domestic two-function packaging equipment with original design and revolutionary patents. It has both practicality and forward-looking features, greatly improve the utilization of packaging equipment

PLC controlled, through double cutting methods(tooth cutter/flat cutter/shaped R angle cutter) to make different types of bag shapes. Several optional measuring devices (inclined screw metering device/vertical screw metering device/horizontal screw metering device), enable to pack various materials such as soybean milk powder/milk powder/instant coffee powder/protein powder/curry powder, etc

One machine can produce two types of packaging forms (triangular sealed/back-sealed)
One button to swith

Shape Triangle bag/rectangular bag **Capacity** 40-80 bags/min

Packaging Method 3-side ultrasonic sealing Back sealing **Sealing lines** Stripe Checkered Diamonds etc

Packaging Material PET/PE PET/AL/PE Paper/PE OPP/PE and other heat-sealable composite packaging materials

Bag Size W30-140mm L40-180mm

Cutting Method Double cutting. Optional cutter including tooth cutter/flat cutter/shaped R angle cutter

Dimensions L860xW850xH1800 **Weight** 330-360KG

Power Supply Electricity: 1P/200-240V/1.8KW/47-63HZ Compressed air: 120-160L/min. 0.5-0.6Mpa
