

CEE-280F

Full Function Bag Making Machine for Power

The world's first full-functional packaging equipment with original design and revolutionary patents. It has both practicality and forward-looking features, greatly improve the utilization of packaging equipment

Features

One machine can produce four types of packaging forms (triangular sealed/four-side sealed/back-sealed/heat-sealed triangular bag)
One button to switch

PLC controlled, multiple options for measuring devices (inclined screw metering device/vertical screw metering device/horizontal screw metering device), enable to pack various materials such as soybean milk powder/milk powder/instant coffee powder/protein powder/seasoning powder, etc

Shape	Triangle bag/rectangular bag	Capacity	36-60 bags/min
Packaging Method	3-side/4-side ultrasonic sealing, Back sealing, Triangle sealing		
Sealing lines	Stripe Checkered Diamonds etc. (Special lines can be customized)		
Packaging Material	PET/PE PET/AL/PE Paper/PE OPP/PE and other heat-sealable composite packaging materials		
Bag Size	W30-140mm L40-180mm		
Cutter type	Intermediate cutter/tooth cutter/flat cutter. This machine supports multi-pack cutting		
Dimensions	L860xW850xH1700	Weight	310-330KG
Power Supply	Electricity: 1P/200-240V/2.2KW/47-63HZ Compressed air: 120-160L/min. 0.5-0.6Mpa
